

SPRINT & MEETING NOTES

Sprint 1 Review

Sprint 1 focused on understanding the workforce dataset and performing SQL-based analysis. Employee distribution, attrition trends, and workforce KPIs were identified.

Sprint 2 Review

Sprint 2 involved exploratory data analysis and machine learning development. Risk scores and employee predictions were generated using logistic regression.

Sprint 3 Review

Sprint 3 focused on dashboard development, predictive workforce insights, and project documentation.

Key Decisions

- Overtime was identified as a major attrition factor.
- Job satisfaction impacts employee retention.
- Risk prediction improves workforce planning.
